

HOW TO MAKE A PAPER PLATE STREAMER

By Patty Kimbrell, M.Ed.
PattyKimbrellMEd@gmail.com

Supplies:

- One paper plate (do not use Chinette brand, it is too thick)
- Double sided-tape, glue or glue dots
- Scissors (if children are cutting, adult supervision is a must!)
- Colored strips of 2' tissue paper in two feet lengths

Directions:

1. Cut out center of paper plate. Adult supervision is a must if young children are using scissors.

2. On reverse side of the paper plate apply 5-6 tissue paper strips with double sided tape, glue or glue dots. If you use glue, you will need to wait until the glue has dried before using the homemade paper plate streamer.

3. Clean up scraps, tidy the area, and get ready to use the paper plate streamers as you march, gallop, skip, jump! Don't forget to use the non-dominant hand/arm too!
